DETAILED ACTION

This office action is responsive to amendment filed on 08/08/2008.

Response to Amendment

The Examiner has acknowledged the amended claims 16, 18, 20, 22 – 24, 26, 28 - 29, 31, the cancellation of claims 17, 19, 25, 27, 30, 32 – 34, and the submission of new claims 35 – 36.

Response to Arguments

Applicant's arguments, see amendment, filed 08/08/2008, with respect to the rejection(s) of claim(s) 16, 18, 20, 22 – 24, 26, 28 - 29, and 31 under 35 U.S.C. 102(e) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made based on lack of support in the specification of the limitation of " and about arrival at a specified place of a mobile electronic apparatus, the positional information of which is obtained from a predetermined server apparatus over said communication network ".

Claim Rejections - 35 USC § 112

Claims 16, 18, 24, 26, 29, 31, 35, and 36 recite the limitation " the positional information " in (claim 16, line 13; claim 18, line 14; claim 24, line 8; claims 26, 29, 31, 35, line 11; and claim 36, line 12). There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 16, 18, 24, 26, 29, 31, 35, and 36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claims 16, 18, 24, 26, 29, 31, 35, and 36, the limitation of “ and about arrival at a specified place of a mobile electronic apparatus, the positional information of which is obtained from a predetermined server apparatus over said communication network “ is not described in the specification. It has not been disclosed how such limitation is taken place. Therefore, one skilled in the art would not know how to make and/or use the invention.

Claims 20 – 23 and 28 are necessarily rejected as being dependent upon the rejection of claims 16, 18, 24, and 26.
